Tokyo, Japan**

SUCCESS PROJECTS IN KAZAKHSTAN

KASHAGAN

Kashagan is a participant in a Large-scale project. In 2002, **INPEX** entered into an oil and gas project at the Kashagan field.

ATYRAU REFINERY

The project "Reconstruction of Atyrau Refinery" was implemented by a group of Japanese companies "Marubeni Corporation" and "JGC Corporation" on a turnkey basis.

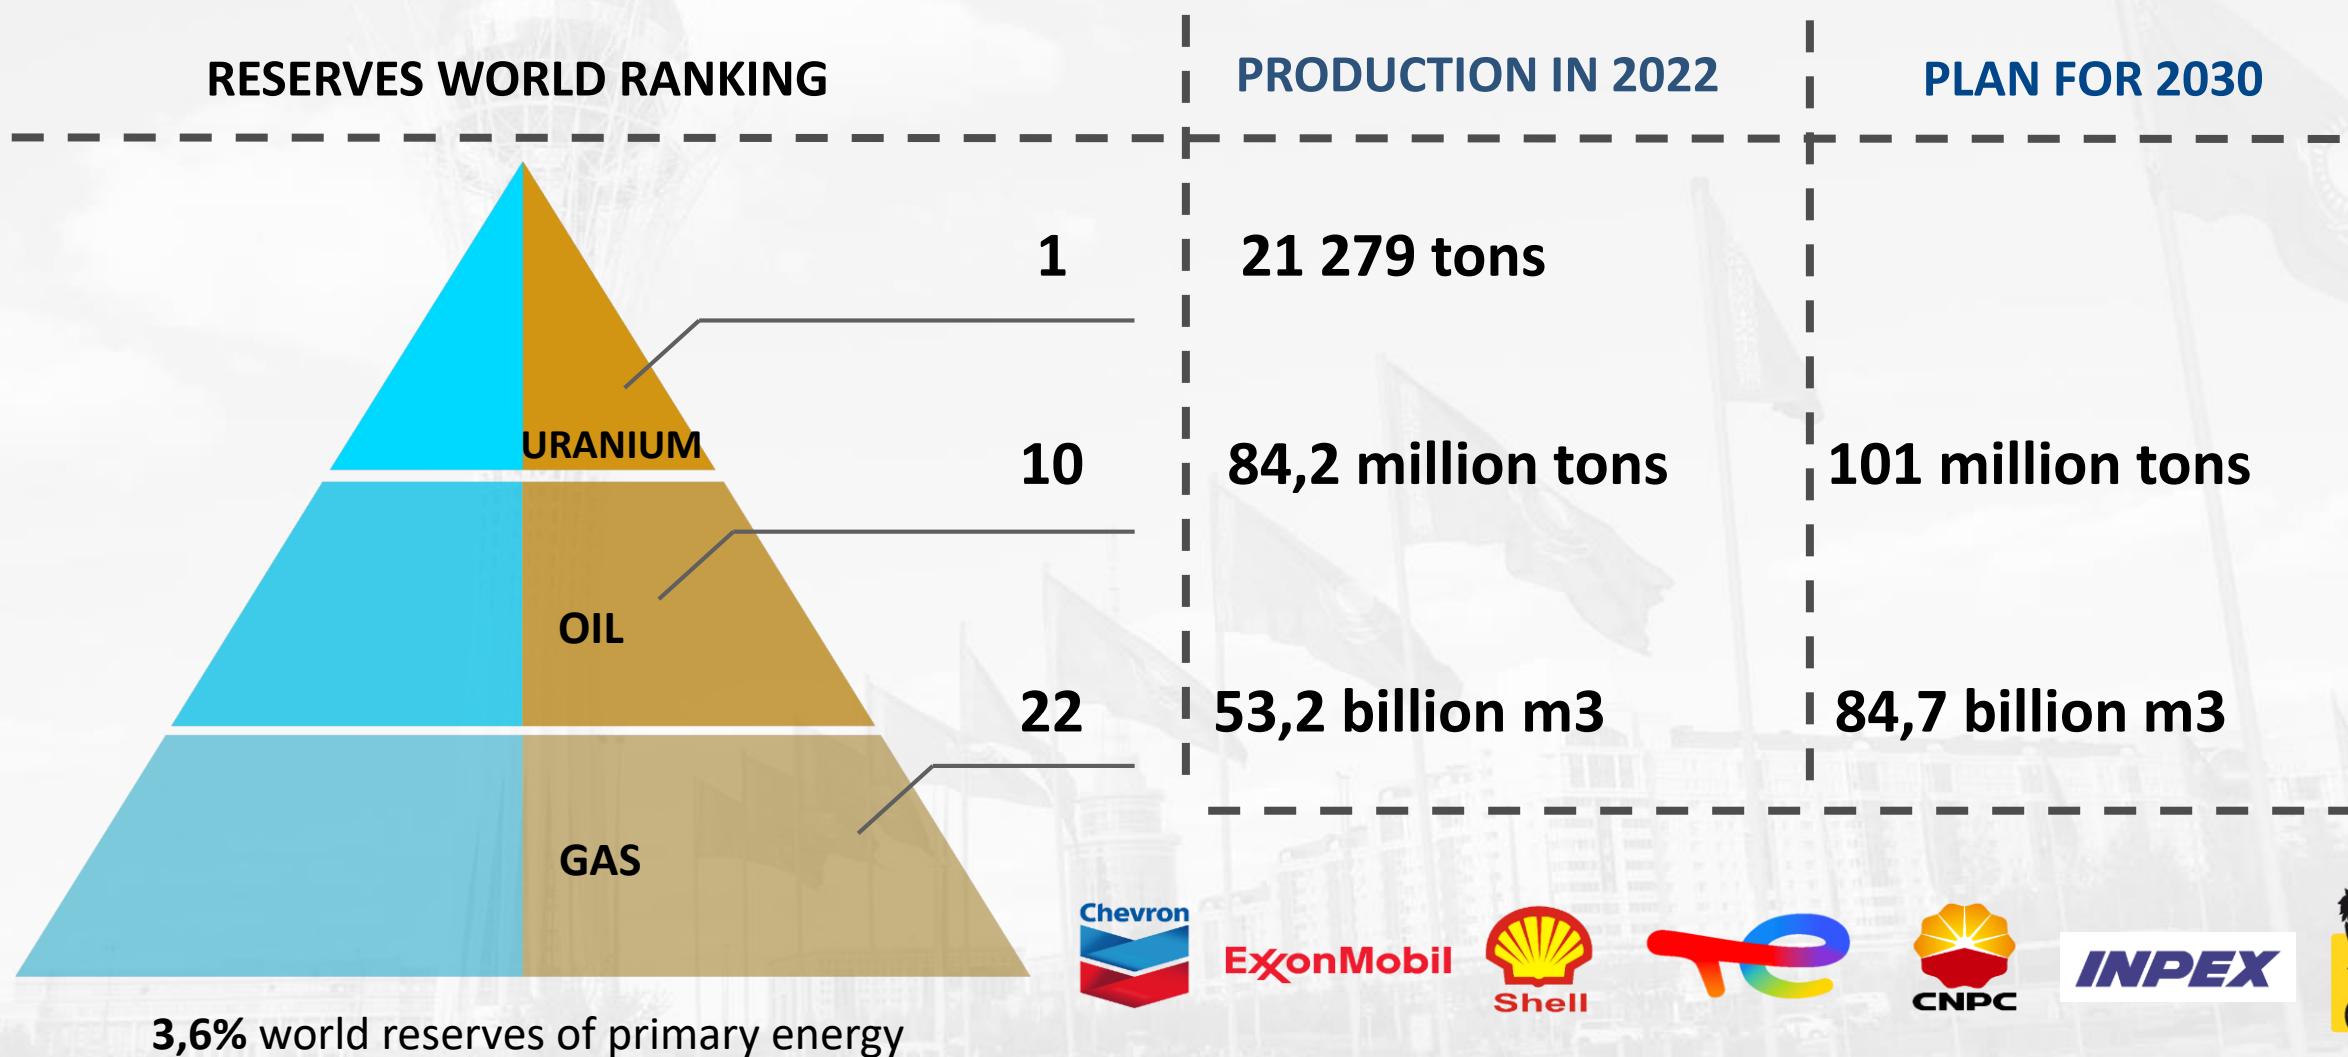

The Yokogawa company has been providing a full range of technical support services since 2005. Distributed control system (*DCS*) and emergency protection (*PAZ*) manufactured by Yokogawa.

IMPROVED MODEL CONTRACT

REGULATORY PREFERENCES

- **stability of contract terms**
- international **arbitration** for dispute resolution
- free **choice** of crude oil export
- **simplified transition** from exploration to production

FISCAL PREFERENCES

- application of the **simplified taxation regime** for subsurface users
- increase in the limit to depreciation **up to 50%** for costs after the start of production
- temporary exemption from **Property tax**
- simplified fiscal regime

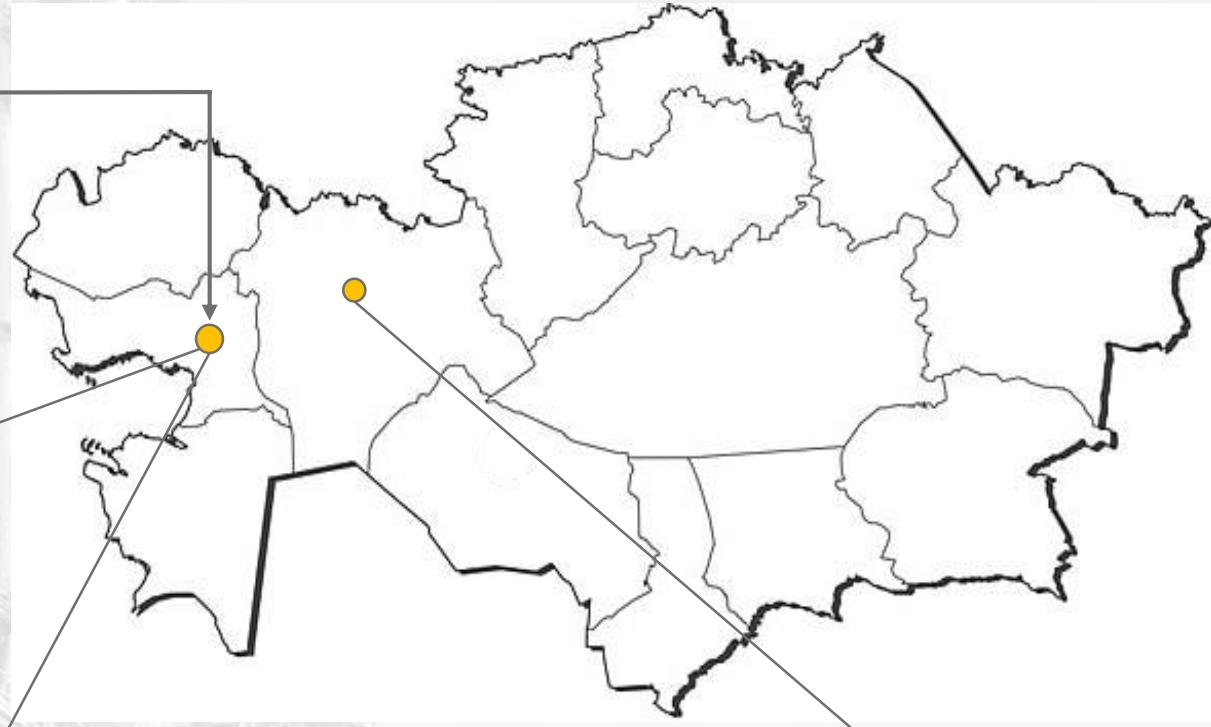

Signed 3 IMCs, at sea (**Kalamkas/Khazar**), on land (**Karaton subsalt**),
gas project (**Urikhtau**), with investments of **\$8.0 billion**

PROMISING PROJECTS OF THE PETROCHEMICAL INDUSTRY

PREFERENCES

For FEZ "NATIONAL INDUSTRIAL PETROCHEMICAL TECHNOPARK"

- **TAX BENEFITS:**
0% on corporate income, land, property tax, VAT;
- Simplified procedure for attracting foreign labor;
- Exemption from customs duties;
- Providing infrastructure.

Polyethylene terephthalate production project

Raw materials: 400 thousand tons paraxylene + 18 thousand tons. acetic acid – the resulting product is 620 thousand tons. terephthalic acid + 245 thousand tons. monoethylene glycol.

Product: polyethylene terephthalate - 735 thousand tons.

Cost: ~\$1.1-1.5 billions.

Implementation period : 2023 – 2029 yrs.

Polystyrene production project

Raw materials: 133 thousand tons. benzene, 50 thousand tons. ethylene.

Product: 155 thousand tons of polystyrene.

Today the project is at the development stage, parameters for investment and implementation time are being clarified.

Urea production project

Raw materials: up to 1 billion m³ of natural gas from the Ts.Urikhtau field in the Aktobe region.

Product: 1 155 – 1 300 thousand tons urea.

Cost: ~\$1.5 billion

Implementation period : 2023 – 2028 yrs.

UPCOMING PETROCHEMICAL PROJECTS

Polyethylene production project

Capacity: 1,250 thousand tons/year

Cost: \$7.7 billion.

Implementation period: 2022 – 2029 yrs.

Project participants: JSC NC KazMunayGas, LLC SIBUR, Sinopec

Current situation: design documentation is being developed

Project “Construction of a gas separation complex” in Tengiz

Capacity: 9.1 billion m³

Cost: \$2.8 billion (100% loan from the National Fund of the Republic of Kazakhstan)

Implementation period: 2019 – 2029 yrs.

Conducting a tender for EPC: end of the 2nd half of 2024.

Butadiene production project

Capacity: 250-340 thousand tons/year

Cost: \$888 million

Implementation period: 2022 – 2026 yrs.

Project participants: PJSC Tatneft, JSC Samruk-Kazyna Ondeu.

Current situation: design documentation is being developed.

NUCLEAR INDUSTRY

№1

IN THE WORLD URANIUM MINING

SHARE OF GLOBAL PRODUCTION

≈40%

№2

IN THE WORLD BY URANIUM RESERVES
(≈700 thousand tons)

SHARE OF WORLD URANIUM RESERVES

14%

№1

IN THE WORLD

launched into industrial production a mine based on the method of underground leaching with a capacity of 1,000 tons of uranium per year.

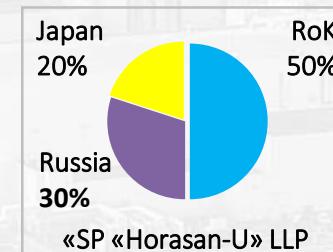

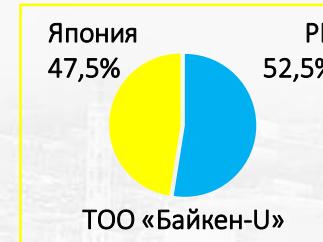

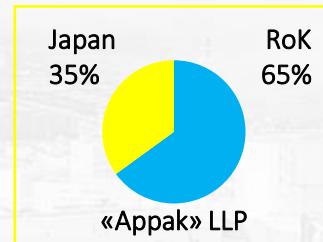

Natural uranium mining regions

Akmola region

Kyzylorda region

Turkestan region

Cooperation with Japan in the field of natural uranium mining

For uranium production by joint ventures with Japan, it amounted to 5.75% (1,223 tons) of the total uranium production in the Republic of Kazakhstan for 2022.
